PROJECTS

MindEase | [Link](#) – Swift, SwiftUI, Figma

- Built a mobile app to support college students' mental health by providing stress-management tools, that could reduce the **20% suicide consideration** rate linked to academic pressure, and access to **real-time** stigma-free support from mental health experts.

NEAIA | [Link](#) – Python, OpenAI

- Developed a Non-Emergency AI Assistant (NEAIA), to assist 911 dispatchers in handling/filtering reports and analyzing them in real-time, and provide detailed summaries to dispatch handlers, enabling them to focus on actual emergencies.

Traffic Sense | [Link](#) – Arduino, C++, ESP32

- Collaborated with a team to develop an IoT-powered solution that monitors customer traffic patterns, empowering small business owners to make data-driven decisions, optimize operations, and improve sales strategies.
